SUBJECT: Confirmation of revised site boundaries for the Dayco Corp./L.E. Carpenter & Co. site photo analysis (TS-PIC 91098)

DATE: July 26, 1991

The purpose of this is to bring you up to speed on the analysis of the above named site. I have decided to use as the site boundary an approximation of the Dayco Corp./L.E. Carpenter property line as depicted on two site maps (provided with collateral data) from Geoengineering. The reason for this is that the "Site Area", shown in attachment 1 of the project request, covers too large of an area. It also includes areas which are irrelevant to the analysis ie. residential areas, etc. I have reviewed the photography carefully and determined that there are no noticable sources of contamination outside the boundaries of Dayco Corp./L.E. Carpenter, particularly in the earlier years of film. Therefore, I decided to focus my efforts on the company property itself. Of course, if careful scrutiny during this study does reveal suspicious activity offsite, it will be noted in the report and/or on the photo enlargements. Enclosed is a sample figure with the site boundary for your review.

Also for your information, the following dates of photography are being used in the analysis of this site:

December 19, 1940  
April 23, 1951  
May 7, 1957  
May 5, 1963  
May 11, 1966  
February 24, 1970  
November 6, 1970  
March 15, 1974  
July 7, 1979  
June 23, 1983  
April 19, 1990

Of these dates, the following will be included as figures in the final report:

April 23, 1951  
May 7, 1957  
May 11, 1966  
February 24, 1970  
July 7, 1979  
June 23, 1983  
April 19, 1990 (Wetlands Analysis)

If you have comments or concerns or if there is any way that EPIC can be of further assistance, please contact me (after 3PM weekdays) or Tom Osberg at 703-349-8975.
